Mike,

Attached are updated drafts:

- CFAC final listing decision communication strategy –
 - Reflects the new timeline of publishing to the Federal Register (FR) on FRI 9/9 and notifications starting WED 9/7.
 - Revised Superfund Alternative Approach talking point: The Superfund Alternative (SA) approach was requested by the Glencore/CFAC and the EPA seriously considered the SA approach for the site. However, the EPA chose not to pursue the SA approach because *of the scientific data comments received during the comment period as well as* the City of Columbia Falls, the Governor's office and Senator Tester's office supported full listing. Please let me know if we can add to this.
- CFAC webpage update – Per Region 8 guidance, we are going to update our webpage FRI 9/9 in sync with FR publication. We will still have to make other small updates afterwards when links are available and the public meeting is set.
- CFAC community update – Also scheduled for release FRI 9/9. I added language about CAGs, inserted hyperlinks and hyperlink placeholders, and rearranged/tweak a little language.

Please let me know if you/anyone has feedback. Thanks!
